

Name: Aman Kanswal

Course: BCA 6 A

Roll no: 1121012

A4) Objective: To implement and generate a one time password (otp)

Source Code

```
import math, random
def genOTP():
    digits = "0123456789"
    OTP = ""
    for i in range(4):
        OTP += digits [math.floor (random.random()
                                     * 10)]
    return OTP
```

```
if __name__ == "__main__":
    print("OTP for 4 digits:", genOTP())
```
