

Name \Rightarrow Gaurav Kharayat Course \Rightarrow BCA

Sec \Rightarrow A110 University Roll No. \Rightarrow 1121051

Ans1 \Rightarrow 3 Aspect of for security of google

Account \Rightarrow

1- Use unique, strong passwords \Rightarrow It's risky use the same password on multiple sites. If your password for one site is hacked, it could be used to get into your accounts for multiple sites. Make sure to create strong, unique password for each account.

2- Update your software \Rightarrow If your browser, operating system, or apps are out of date, the software might not safe from hackers. Keep ~~yourself~~ your software updated to help protect your account.

3- Remove apps & browser extensions you don't need \Rightarrow As more Apps are installed on a device, it can become more vulnerable. Install

only essential apps and browser extension
on devices that have access to sensitive
information. Avoid installing unknown apps from
unknown sources to protect your device and
personal info.
