Q1 Find any 3 security aspects of google account.

Soln

(i) Do a security checkup
Go to security checkup to get personalized security recommendations for your google account including

- Turn on 2-step verification
- Turn on screen locks
- update account recovery options

(ii) update your s/w

If your browser, operating system, or apps are out of date the software might not be safe from hackers.

→ update your browser, apps & operating system.

(iii) use unique, strong passwords.

It's risky to use the same passwords on multiple sites. If password for one site is hacked it could be used to get into accounts for multiple sites.

→ Merge your passwords

→ protect your passwords from hackers

(iv) Remove apps and browser extensions you don't need

As more apps are installed on a device it can become more vulnerable. Install only essential apps and browser extensions.

→ Delete or disable app.

→ uninstall extensions on chrome.

(v) Protect against suspicious message & Content hackers can use emails, text messages, phone calls.

→ Avoid suspicious request.

→ Avoid suspicious email.

→ avoid suspicious web pages
