Name: Adarsh Barthwal   Roll No - 1121006

Course: BCA 6 A   Sub- info security and cyber law

Adarsh
Barthwal

Ans 2.   So 3 of the security aspects of the

browser are.

(1). Accessing browser history

Your browser history is a veritable map of
where you go on the internet and for what
purpose. Knowing you access certain sites,
establishing your purchasing & habits or even
blackmail if the sites are proven illegal or
unethical , or allegations there of can be
made.

To prevent this one must clear browsing
history time to time.

(2). Obtaining autofill information
Autofill info can be deadly. Chrome can
save your personal info and if someone
gained access to your device. Now they know
everything about you.

Never save critical info in autofill.

3- Analyzing Cookies

Cookies are another potential attack
vector. Like the browsing history, they can
reveal where you go and what you do.
Disabling or refusing to accept cookies
is a potential solution.
